QUALITY FOR PLUMBING

Trap for floor-level showers, wall installation

An easy and innovative item joins the Valsir product range. It's a wall trap system, suitable for renovations and new installations, which can incorporate condensation drainage from the A/C system.

It is the only wall trap for showers made in two versions, a 30 mm or a 50 mm water guard, which adapts to any installation.

The special connection for the A/C system avoids the foul smells returns.

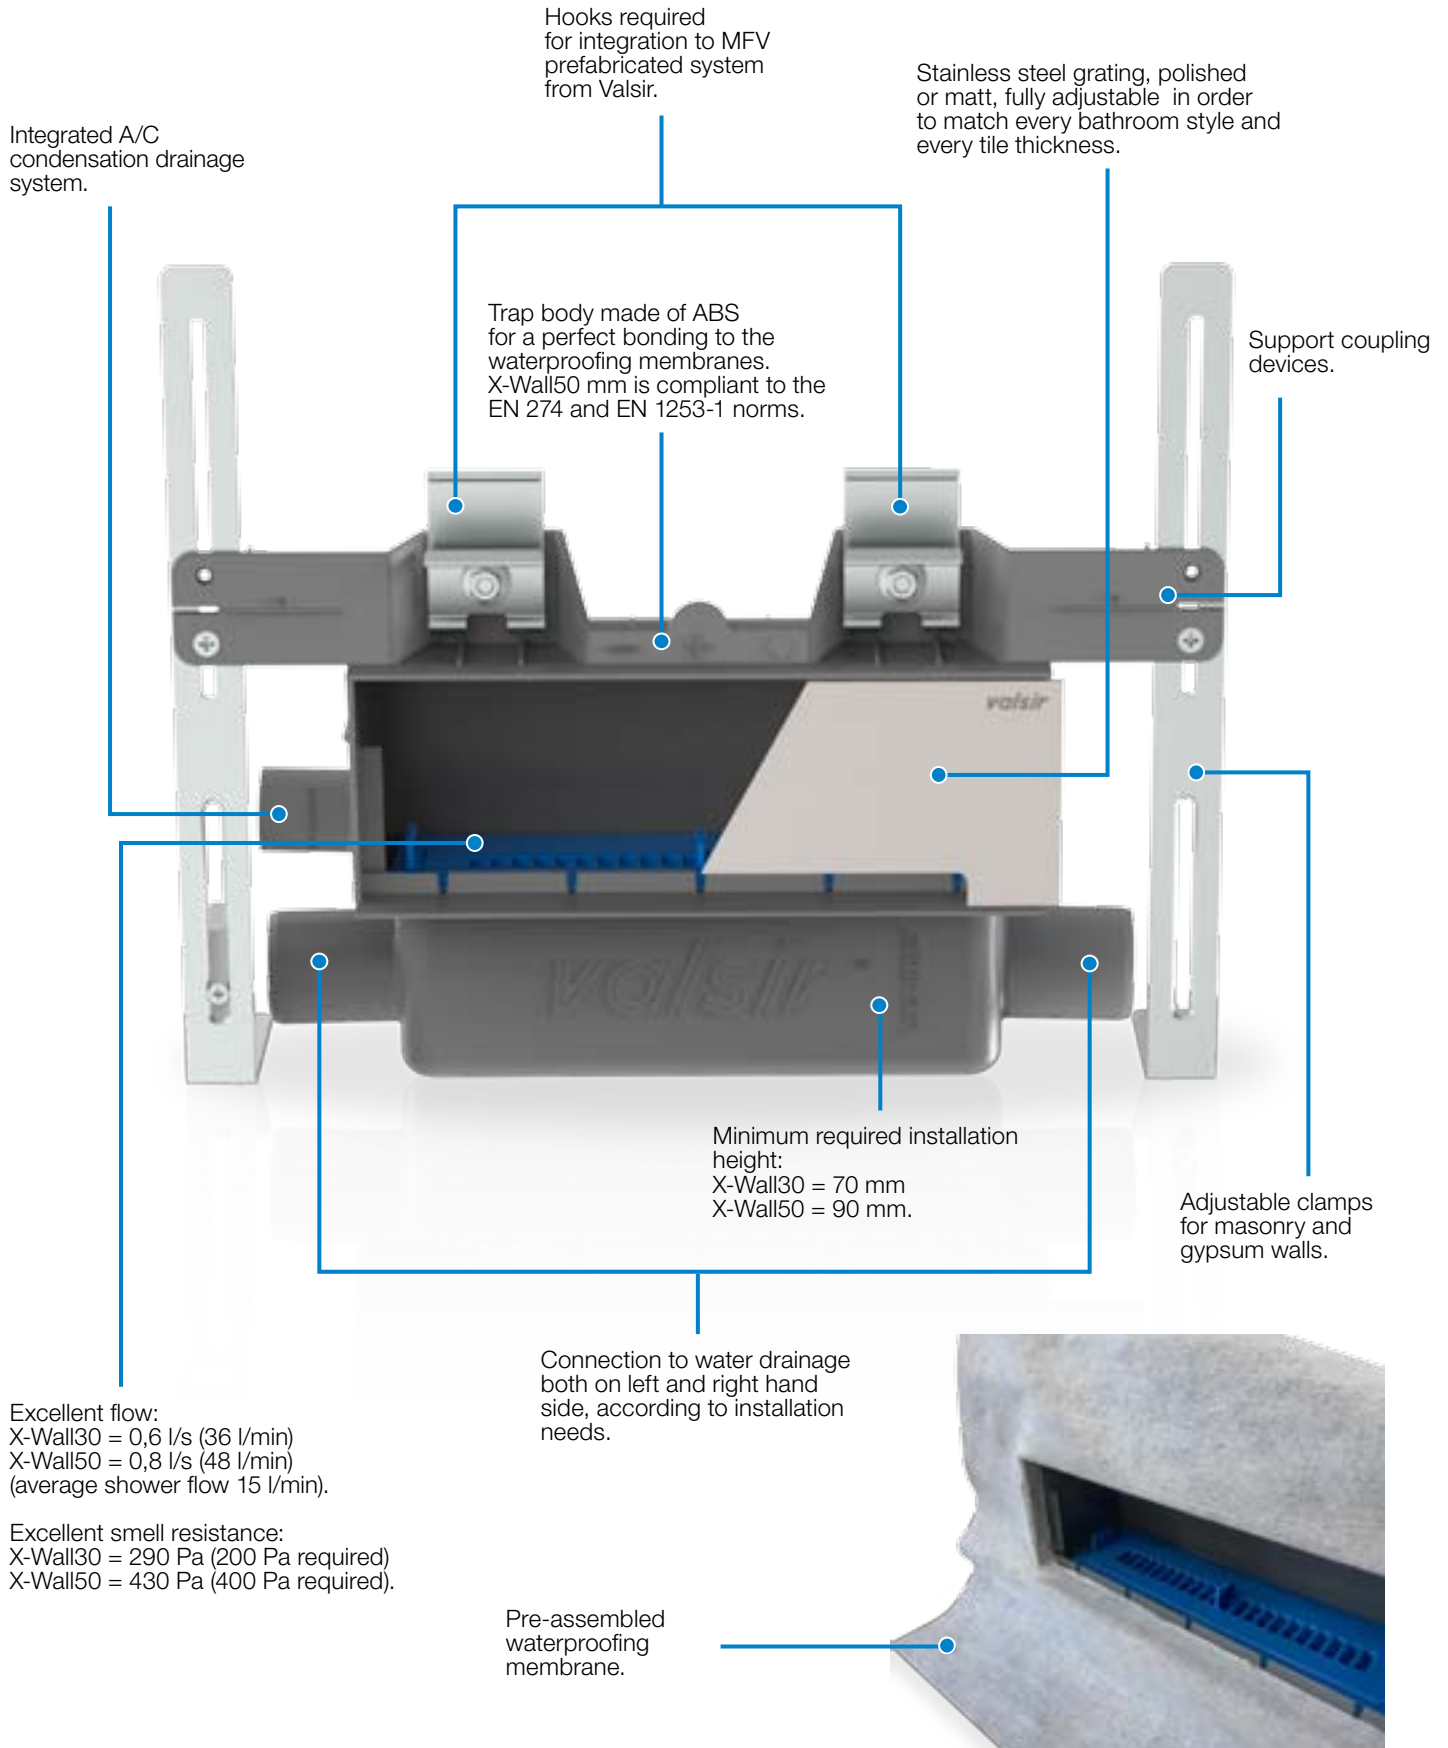

The trap is fully accessible in order to ease as much as possible cleaning and maintenance operations. X-Wall can be installed in any type of wall and in prefabricated MFV systems, and it will make your bathroom modern, linear and safe.
